

.NET / full stack developer

Fusebox is a global SaaS solution that offers tools to optimize energy costs, reduce CO2 emissions, and create new revenue streams by trading on the energy markets. Fusebox pays customers for going green!

Check more info here: <https://fusebox.energy/>

We are looking to grow our core IT team to turn even more green ideas into reality!

Our tech stack: .NET Core / C# PostgreSQL Azure Cloud
Docker and Kubernetes Vue.js

You are a perfect match if you have good English skills and feel confident in .NET Core / C#.

Your challenges and responsibilities as an experienced team member:

- Take part in shaping a technological ecosystem that is highly available and scalable
- Research and develop new product features
- Build integrations with different partners and clients
- Participate in technical decision-making
- Participate in code reviews and quality assurance activities

What to expect?

- You are a core member of an experienced IT team
- Autonomy and freedom to speak your mind
- Flexible working hours and remote work possibility
- Motivating compensation package including extra vacation week from 2nd year, sports and health compensation, top notch IT gear, etc.
- New and cool office in Ülemiste City, Estonia

Send your CV and short motivational letter to our COO Dagmar
