

Fusebox is looking for

Automation Engineer

Fusebox is the most efficient flexibility trading platform, in order to unlock the vast potential of flexibility throughout the energy system and help to grow our client's environmental handprint globally. **Our mission** is to provide a demand response platform that allows our customers to contribute to the renewable energy transition while earning revenue and saving on energy bills.

Check more info here: <https://fusebox.energy/>

As our Automation Engineer, you will prepare the customer's technical readiness to join Fusebox and help them to contribute to greener society and earn revenue without interrupting their core business.

This is an outstanding opportunity for a tech professional to join rapidly growing company. We need you to help get us from running to sprinting to accelerate our global expansion!

You will be

- meeting clients on-site, online and over the phone
- creating on-site automation system integrations (via Modbus mostly)
- PLC programming and configuration (Python, SQL)
- performing hardware support and monitoring
- participating in technical decision-making

You are the perfect match for the role if you have

- worked at least 3 years in a position of automation, industrial, or energy field
- a comfortable level of English and Estonian

Please add a short motivational letter illustrating how you see yourself as the best fit for our team. Applications will be reviewed on a rolling basis, so please do not hesitate to apply ASAP.

What to expect in Fusebox?

- You'll be part of the team establishing our company as a leading market force, developing and maintaining effective working relationships inside and outside the company
- Busy days full of challenges
- Highly motivated team of professionals
- Autonomy and open floor for ideas and suggestions to make the growth come real
- Motivating compensation package including flexible working hours, extra vacation week from 2nd year, sports and health compensation, top-notch IT coverage, etc
- Training and development possibilities as a standard of normality
- New and cool office in Ülemiste City in Tallinn

If you have any questions, you can ask directly our COO Dagmar dagmar@fusebox.energy
